

Proofs of the Superiority of the

WALTHAM MACHINES

This country has reason to be proud of this splendid specimen of American operative genius and enterprise. That it will make a revolution in the water-manufacturing of the world no one can doubt who examines the picture. The machine is a masterpiece of art for it turns out water movements at just the uniform rate of all imported movements—be they better or not—thus giving them a good advantage over all others wherever known. A poor time for the machine made will be as rare in the future as a good time for the imported. The machine is not made at arbitrary times but at regular intervals and can make a period of time as long or as short as is desired. It will be a cause of congratulation to the world, if the American Enterprise shall have the effect of driving out of market the thousands of trawls and fishing nets and mechanical timckpieces, by furnishing so excellent and economical a substitute.

"We have had over of the works of this Company a case for some considerable time, and comparing it with the other works of this kind, we have been impressed by it, they have outbalded in our

"These are the best pieces," said *The World*.
 "The entire satisfaction of the Paris Exposition is the advance of specimens of American manufacture which, although only comparatively recent in date, are so strongly impregnated with the most satisfactory character. The watches manufactured in this country are distinguished by their strength, durability, and excellence as time-keepers. They are the best of any thing produced by the French or Swiss manufacturers."
 "The beauty, the precision, the greater cheapness, and the superior quality of the watches manufactured by us to those of France, are attested by a unanimity of opinion—that the mere spectacle of its operation is a people, gradually give the American watches a pre-eminence which will not be surpassed."*—Harper's Weekly.*
